ADMINISTRATIVE PROCEDURE

THE DISTRICT

IMPLEMENTING INSTITUTIONAL EFFECTIVENESS

CHAPTER 1

AP 1202

Purpose
This administrative procedure supports District efforts to achieve and maintain institutional effectiveness by specifying how Board Policy 1202, Institutional Effectiveness, is implemented. Additional relevant policies and procedures include: Board Policy 1200, District Vision, Values, Mission and Goals; Board Policy 4000, Standards of Educational Excellence; Administrative Procedure 4000, Sustaining Standards of Educational Excellence.

Achieving the District Vision, Values, Mission and Goals
District processes for ensuring institutional effectiveness are grounded in sound review and planning efforts. The process begins with a community and campus discussion of the vision, values, mission, and goals of the college to ensure that meeting the needs of the community remain central. The Board of Trustees adopts these items and thereby sets the overall direction of the college through Board Policy 1200, District Vision, Values, Mission and Goals.

To fully implement the direction set by the Board, the Superintendent/President is empowered to collaborate with the campus community to determine and establish relevant priorities and action plans. The Superintendent/President is additionally responsible for ensuring that progress on achieving District goals is evaluated using performance indicators. Reports of District performance are annually shared with the Board and the community to monitor its progress on goals, and to stimulate broad-based dialogue and spur action focused on continuous improvement.

This process of closing the loop is conducted on a regular basis to provide opportunities for improvements on all levels of planning and operations. In order to be supported with resources, District plans must be relevant to established strategic priorities and likely to achieve their proposed outcomes. Annual program review and planning processes are regulated by the Program Review Handbook and Administrative Procedure 6200, Budget Development.

Institutional effectiveness is operationally defined on 2 levels:

- at the program level, as progress on program goals established in the Educational Master Plan; and

- at the institution level by assessing progress on District goals specified in Board Policy 1200.

As such, the work system for institutional effectiveness relies in part on information derived from annual program review and planning processes, as well as information gathered from other sources—some of which are determined by state and federal accountability reporting mandates.
Evaluating and Reporting Institutional Effectiveness

The conceptual model of institutional effectiveness measures is depicted in the figure below. These indicators represent a wide array of factors aligned to each of the District goals following a balanced scorecard methodology, the “VVC Institutional Effectiveness Scorecard” will be comprised of metrics relevant to 4 domains: (1) student-centered measures; (2) financial measures; (3) operations/process measures; (4) learning/growth measures.

The Office of Institutional Effectiveness and Research (OIER) will collaboratively review and refine measures for each Board-adopted goal with a group of volunteers from across the campus on an annual basis. The Institutional Effectiveness Committee will advise the OIER as it prepares a comprehensive summary and analysis of the measures. The final scorecard will be disseminated to the campus community as a core part of established institutional data to spur analysis and dialogue for the purpose of ongoing improvement of campus systems, programs, and processes. Public dissemination of the institutional measures will follow campus consultation, and will comply with accrediting standards and accountability reporting mandates.

SHORT-RANGE PLANNING
(aka PRAISE Process)

ANNUAL REVIEW
- What progress have we made on District goals accordingly?
- Are we still aligned to the strategic priorities or have things changed?

ACTION PLANNING
- Do we continue efforts or redesign plans?

DEPLOY & CHECK
- What impact are improvements having on intended outcomes?

RESOURCE PLANNING
- Do our resource investments need to be re-focused?
