

Successful Advancement in Mathematics

BSSOT Grant

VICTOR VALLEY COLLEGE CLASSROOMS GET AN UPGRADE!!!

SAM GRANT OUTREACH

About the Grant

The Successful Advancement in Mathematics (SAM) Grant was developed to redesign Victor Valley College's math program by adopting evidence based practices that promise to improve student outcomes. The SAM Grant has begun making an impact by:

- Providing professional development opportunities for VVC math faculty.
- Upgrading classrooms by installing state-of-the-art Clear Touch digital displays to increase interaction.
- Installing DiversiBoard dry erase skin panels all around the room to increase student engagement and group work.
- Host symposiums and workshops to promote collaboration between VVC and local secondary school educators.

...and this is just the beginning...

VVC welcomes our newest member to the team, Alma De Santos, who will serve as the SAM Grant Outreach Coordinator.

Want to schedule an Outreach presentation at your campus?

SAM Grant Outreach is focused on creating awareness among students. It is the goal to ensure our students have updated knowledge on the processes involved in transitioning after high school.

Students must be aware of the many opportunities in degree majors, what goals must be met to graduate, and the criteria for transferring to a university. Ms. De Santos can support in creating that awareness, sharing student experience, and discuss how vital Math is to a students' college career!!

Contact us today to schedule an outreach event at your school.
