Do you struggle with Math?

This is not going to be like any math course you’ve ever been in!

**Math 63** (Prerequisite: Math 12) is a new math course for non-STEM* students which will help get you ready for Math 120, Intro to Statistics. Math 63 is a 5-unit course.

After passing **Math 63**, you can go straight to Math 120, Intro to Statistics, which will meet your graduation requirement in math!  Math 12 → Math 63 → Math 120

**Who should take this course?**
If you are a liberal arts major or seeking a vocation not requiring the typical sequence of algebra courses, you should consider taking Math 63, followed by Math 120.

**Who should NOT take Math 63?**
If you are going to major in any area which might require a strong math preparation (math, any science, computer science, business, engineering, nursing, EMT, RT, or teaching), you should NOT take Math 63.

Math 63 does NOT meet the graduation requirement at VVC by itself. You must also complete Math 120 to meet your math graduation requirement. Math 120 also satisfies transfer GE requirements for many majors at many universities (i.e., Criminal Justice, Child Development, Communication Studies, History, Sociology, Psychology, Geography, Political Science, English, among others).

*STEM refers to Science, Technology, Engineering, and Math. This is a non-STEM course.
