(Procured through CMAS) over asphaltic concrete paved base w/ aggregate sub-base.  
ACO System 3000 interior perimeter drain

# REFERENCE FACILITIES

# SYNTHETIC TURF MATERIALS

## FIELDTURF

### SPECIFICATIONS:

Vertex Prime Turf with CoolPlay natural cork infill, over Brock Powerbase Pro shock pad

LPA

### VERTEX PRIME

[Overview](#) [Technical](#)

FieldTurf Vertex Prime is comprised of specially designed slit-film fibers and high performance ridged monofilament fibers. The fibrillation process of the slit-film component allows for proper infill encapsulation while the monofilament fibers facilitate grass-like ball roll. Both fibers are tufted together in the same stitch for a superior aesthetic appearance.

### COOLPLAY

[Overview](#) [Technical](#)

#### High Performance. Low Temperature.

FieldTurf's exclusive and innovative extruded composite (EC) top dressing allows the CoolPlay system to deliver the same behavior and overall stability as FieldTurf's Elite system fields found in the world's most famous stadiums. CoolPlay takes nothing away from performance... except the heat.
