

## Notification of Potential Exposure to COVID-19

In compliance with legislative reporting requirements California State Assembly Bill 685 (AB 685), Victor Valley College is required to notify employees, including vendors and contractors, of potential workplace exposure to COVID-19. To comply with this requirement, the information below lists dates and locations of at least one workplace exposure of an individual or individuals who tested positive for COVID-19.

- If you were present at the same worksite during this period, you may or may not have been exposed to the virus. If you do NOT believe you were exposed, no action is required. As always, wearing a high quality and well-fitting face covering is strongly recommended indoors and/or when social distancing cannot be maintained.
- If you believe that you may have been in close contact\* with the COVID-19 case(s) listed below, please send an email with the necessary information to [COVID.Safe@vvc.edu](mailto:COVID.Safe@vvc.edu).
- Victor Valley College conducts investigations for each exposure listed. If identified as being in close contact\* with the infected individual(s), you will receive an additional notification from Victor Valley College.

*\*Close contact is defined by the California Department of Public Health as being within 6 feet of the case for a total of 15 minutes or more within a 24-hour period.*
